

# Shopping Trends Analysis Report

## Problem Statement

The objective of this analysis is to evaluate the location-specific performance of Roots by analyzing customer satisfaction and sales growth over the past four seasons. The goal is to identify the highest-performing locations and uncover the factors contributing to their success. Specifically, the study aims to:

1. Identify the location with the highest average customer satisfaction.
2. Determine the location with the highest sales growth and assess the product categories driving this growth.

This analysis is crucial for enhancing service quality and revenue generation by replicating successful strategies across underperforming locations.

---

## Analytical Tools

Two primary tools were used to conduct this analysis:

- **SPSS:** Employed to analyze customer satisfaction data by calculating key metrics and visualizing trends.
- **COGNOS:** Utilized for analyzing sales growth, identifying regional trends, and uncovering product-specific insights.

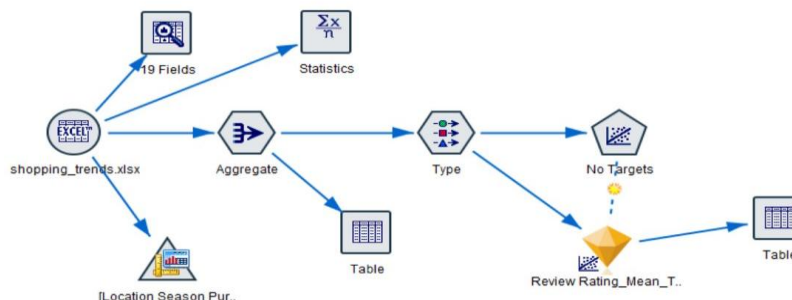

---

## SPSS Analysis

### Data Source and Processing

The dataset used for this analysis, "shopping\_trends.xlsx," contains 19 fields. The data underwent preprocessing to ensure consistency and meaningful insights. Key steps included:

- **Aggregation:** Data was grouped by location, and key metrics were calculated:
  - **Review Rating Mean:** To assess customer satisfaction.
  - **Purchase Amount Sum:** To measure total sales.

Key fields:

Location

Basic Aggregates

Aggregate fields:

## COGNOS Analysis

## Sales Growth and Product Performance

### 1. Highest Sales Growth Location:

- Cognos identified the location with the highest sales growth, highlighting the product categories driving this success.

### 2. Regional Insights:

- Sales patterns varied significantly by region, with higher purchase activity in states like Florida and California.
- The analysis also revealed underperforming regions, pointing to areas where strategic interventions could yield significant improvements.

## Correlation Analysis

### • Purchase Amount and Review Ratings:

- A very weak correlation (0.031) was observed between purchase amounts and customer satisfaction, suggesting other factors drive sales growth beyond customer satisfaction.

## 5. Enhance Online Presence:

- Strengthen digital marketing efforts in low-performing areas through targeted ads, regional social media campaigns, and collaborations with local influencers.

---

## Conclusion

This analysis highlights the importance of leveraging data analytics to identify success factors and address performance gaps across locations. By implementing the recommendations outlined above, Roots can enhance customer satisfaction, optimize sales growth, and replicate the success of top-performing locations across its network.
